Education

MSc. Aerospace Engineering - TU Delft 2024 - 2026

- **Thesis:** "Design, Optimization and Additive Manufacturing of Gradient Index Lenses for Scan Enhancement of Phased Array Antennas".
- Weighted GPA: 8,5/10.

BSc. Aerospace Engineering - TU Delft 2018 - 2024

Graduation Project: Feasibility study of a reusable deployable lunar habitat.,

Experience

Teaching Assistant - TU Delft 2025

- TAd for Spacecraft Thermal Design (AE4ASM526), mostly helping students with ESATAN-TMS software.)

Intern - SRON (Space Research Organisation Netherlands) 2025

- Worked on the NEBULA Xplorer project, an educational smallsat mission for X-Ray astronomy.
- Systems engineering & design of the readout electronics for an array of Silicon Drift Detectors.

AIT technician - Dawn Aerospace 2022 - 2023

- Assembly, Integration and Testing of in-space propulsion systems, focusing on electrical assembly & testing.
- Worked 0.7 FTE from September 2022 to May 2023, and full-time from May to November 2023.

Cleaner - Delft Bleau Bouldering Gym 2022 - 2023

- Vacuumed the mats in the mornings

Engineer / Secretary - Delft Aerospace Rocket Engineering (college rocketry club) 2019 - 2026

- Worked on a variety of projects, ranging from solid rocket motors to DAQ systems for the DLX-150 engine.
- Example: **video of a hotfire test of the DLX-150**
- Served as Secretary of the 21st Board (2021-2022).

Food Delivery - Deliveroo 2019

- Self-explanatory

Skills

Software -

- Python: Experience with common scientific computing libraries, including numpy, scipy, pandas and matplotlib.
- MATLAB: Experience with RF, antenna and global optimization toolboxes. Experience creating scientific figures.
- Multiphysics modelling tools: Used ANSYS, ABAQUS & CST as part of coursework.

Hardware -

- Experience with standard electrical/RF lab equipment
- MAIT experience includes soldering, crimping, PCB assembly and 3D printing.

Languages -

- English (C2)
- French (Native)
